

Salado Special Population Programs

All students in special programs have an individual education plan developed to address their educational needs.

Special Education

Resource classes are mainly offered in the areas of Reading, Language Arts, and Math. The primary curriculums for these subjects are Corrective Reading and Saxon Math. Teachers supplement these programs based on the student's needs. Content Mastery is offered for any subject based on the student's modifications.

Dyslexia

Neuhaus programs are used to address the needs of students identified as dyslexic. The multi-sensory approach is used to teach basic language skills in the areas of reading, writing, and spelling.

English as a Second Language

ESL provides limited English proficient students competency in comprehension, speaking, reading, and writing the English language through programs such as Rosetta Stone, Skills Bank, and Edmark software. The instructor uses ESL and basal print texts to teach English as well as support the students in all core areas.

Reading Intervention/Rallye

Reading lab designed for 2nd – 8th grade students who are decoding below grade level. The instructor uses software programs and directly taught phonics programs like Edmark, LIPS, Read Naturally, and Plato to strengthen phonemic awareness, comprehension, and fluency. Students receive one-on-one reading support.

Grand Central Station

Designed to support at-risk students in the 4th – 8th grade, GCS is a program where students can receive support in any subject through manipulatives, study skills software, and Kurzweil.

Gifted and Talented

K – 8th grade students are offered the opportunity to work on a self-selected independent study project under the guidance of a GT teacher. Additionally, K- 4th grade students participate weekly in a pull-out program. 5th – 12th grade students are offered various AP and Pre-AP classes in further enrich their curriculum.
